# WATERCOLOURS

## WINSOR & NEWTON PROFESSIONAL WATERCOLOURS

**25% OFF TUBES & PANS**

The world's finest water colour, offering the widest choice of pigments and the highest possible permanence.

Since 1832 when Henry Newton and William Winsor introduced the first moist water colours to the world, much of the Winsor & Newton reputation for supreme quality has stemmed from the Artists' Water Colour range.

Since then Winsor & Newton Professional Water Colour continues to be formulated and manufactured according to these founding principles; to create an unparalleled water colour range which offers artists the widest and most balanced choice of pigments with the greatest possible permanence.

Each colour within this wide and balanced spectrum of 107 colours has been selected and formulated to offer the greatest choice so that artists can use a unique palette that best suits their work.

“I normally use the Cotman range, but decided to treat myself to some professional half pans. What an eye opener! The colours are so saturated and vibrant, I think I will be changing over to W&N Professional.”  
M R.Cowes, UK

There are no fillers or white pigment added to enhance opacity.

### PRIMARY MIXING SET

Includes four tubes of professional grade gouache paints. Use these three colours alone to mix secondary greens, oranges and purples, then use Titanium White to adjust the shades.

## SOFT VS HEAVY

So what is the difference between Heavy and Soft Body?

If you thought Soft Body was just a watered down Heavy Body, you'd be wrong. The two paints have compatible binders and pack the same high pigment load.

If you thin Heavy Body with water or medium, you reduce the concentration and get noticeably weaker colours. Paint feel, performance and stability is also impacted, so choose the right consistency of paint for the job!

## LIQUITEX HEAVY BODY

Heavy Body Artist Acrylic Paint, has a thick consistency for traditional art techniques using brushes or knives, as well as for experimental, mixed media, collage and printmaking applications. Impasto applications retain crisp brush stroke and knife marks. Good surface drag provides excellent handling and blending characteristics with increased open-working time. High pigment load produces rich, brilliant, permanent colour. Available in 109 colours in 59ml tubes with black and white also in larger sizes.

## LIQUITEX MEDIUMS

Liquitex offers a range of acrylic mediums to inspire creativity at every stage of the painting process.

Liquitex mediums enable artists to modify acrylic paint and use it in an infinite variety of techniques and applications. Liquitex mediums mixed into acrylic colours can change paint consistency, thickness, transparency, sheen, drying rate, absorption rate and even texture. Compatible with all acrylic paints in this catalogue.

## SURFACE PREPARATION

Surface preparations seal, prime and add tooth (for adhesion) to surfaces such as canvas, wood, paper and metal for acrylic and oil paint. Liquitex Gesso is flexible, non-cracking and non-yellowing when dry.

### GESSO

The classic sealer and ground for absorbent surfaces (canvas, paper, wood and metal). Provides the proper surface texture and absorbency for acrylic/oil paint.

Additives allow the artist to adjust the working properties of acrylic paint. Can be used to increase the flow, opacity, or thickness and more. Use sparingly and only in the amount needed to achieve the desired effect.

## FLUID MEDIUMS **F**

## WINSOR & NEWTON GRIFFIN ALKYD COLOURS

Manufactured from pigments suspended in oil-modified alkyd resin and solvent. The clarity of the alkyd resin allows the full brightness of pigment to show when the colour is dry.

Also ideal for impasto techniques whilst their luminosity and speed of drying makes them an ideal choice for glazing techniques when used with Liquin medium. Griffin Alkyds can be used in conjunction with other oil colour to produce an extensive range of tones and colour shades.

DALER ROWNEY WATER MIXABLE GEORGIAN OIL COLOURS

Georgian Water Mixable Oil colours offer artists the possibility of experiencing oil painting without the need for solvent-based mediums. An alternative to traditional oils, the balanced range of 40 vibrant colours can be thinned, mixed, and washed using water and as such is ideal for use indoors and in a classroom environment. All Georgian Water Mixable Oil colours offer

high levels of lightfastness, pigment load and durability. The viscosity and smooth texture of the colours out of the tube mirror traditional oil colours and can be used for impasto techniques, or thinned down with water they can create wash effects similar to watercolours. Surface-dry between 5 and 7 days, and no colour shift from wet to dry.

# OILS

## ARTISAN WATER MIXABLE OIL COLOUR

Artisan is a genuine oil colour made from modified linseed oil and modified safflower oil. It has been specifically developed to appear and work just like conventional oil colour.

The key difference between Artisan and conventional oils is its ability to thin and clean up with water. Hazardous solvents are not necessary for Artisan and artists can enjoy a safer painting environment, making it ideal for artists who share a work space, schools or painting at home.

The depth of colour, buttery consistency, lightfastness, opacity/transparency, performance and drying times of Artisan allow artists to use this range for all oil colour techniques.

All 40 colours in the range are available in 37ml tubes. There are two series; Series 1 colours are also available in 200ml tubes.

## SABLE WATERCOLOUR BRUSHES

**WINSOR & NEWTON Series 7™**

### SERIES 7 SABLE BRUSHES

Winsor & Newton Series 7 brushes are the world's finest water colour brush. The standards of quality for this brush were set in 1866, when Her Majesty Queen Victoria gave orders that Winsor & Newton should produce the very finest water colour brushes in her favourite size; the No.7.

*"By all means try another brush, but like me you will always return to these, there is no better." - Tim Gustard*

### Series 7™ MINIATURE KOLINSKY SABLE WATERCOLOUR BRUSH

Made to the same superior quality as Series 7, with the same Kolinsky Sable hair. The only difference is that the hair is comparatively short out of the ferrule, so that the brush point can be more accurately controlled during delicate work.

# OIL AND ACRYLIC BRUSHES

## PRO ARTE ACRYLIX SYNTHETIC BRUSHES

Acrylix brushes are designed as a synthetic alternative to the hog hair brushes for acrylic and oil painting. They go way beyond, offering exciting new properties of their own. Acrylix, though firm, is flexible and has a lovely silky working texture - something it retains after many sessions in use.

Prolonged standing in water has virtually no effect on them which is so essential when using fast drying acrylic colours. This durable pearly filament also helps the artist to see and judge the colour on the brush; they'll endure and delight!

### STERLING ACRYLIX SERIES 201 LONG HANDLED BRUSHES

A ground-breaking long-handled brush designed principally for acrylic painters but now eagerly hi-jacked by oil painters who have quickly realised what a phenomenally precise and versatile tool it is. Silky white filaments, silver lacquered handles.

## WATERCOLOUR PAPER PACKS

SAVE UP TO 36%

Traditionally, the highest quality watercolour papers have always been manufactured from cotton fibres, which impart strength and durability to the sheet. The term 100% rag is still used to denote pure cotton fibre content and freedom from any wood pulp.

High quality artist papers are made on a mould machine, which provides all the appeal of hand made paper, but without the inevitable variations from sheet to sheet. Additionally, the best papers are manufactured to be acid free, thereby preventing degradation.

There are three main surface textures to watercolour papers, HP, CP (NOT) and Rough.

**HP** stands for 'hot pressed' and is the smoothest paper suitable for high detail work.

**CP** stands for 'cold pressed' (and is also known as NOT - as in 'not hot pressed') is a slightly textured surface and popular because it is suitable for most types of work.

**Rough** is exactly what its name suggests, suitable for landscapes, seascapes etc. where a heavily textured paper enhances the final piece of work.

When heavy washes are used on lighter weight paper, stretching is recommended otherwise the paper will buckle or cockle.

See page 87 for our Ken Bromley's Perfect Paper Stretcher and stretch your watercolour paper 'tight as a drum' every time!

## ARTISTS' WATERCOLOUR BLOCKS

**SAVE UP TO 32%**

### What is a Block?

Unlike a pad, on a block the paper is glued on all four sides with a strong backing board and this supports the paper to an extent. Blocks are convenient if you are doing a light wash and do not want to stretch your watercolour paper and are handy to take on holiday or away on trips.

Generally there will be a small gap in the adhesive on a corner, or one of the longest sides of the block; a knife can be slipped into this gap and run around the edges of the paper to remove the top sheet.

### ARCHES AQUARELLE ARTISTS BLOCKS

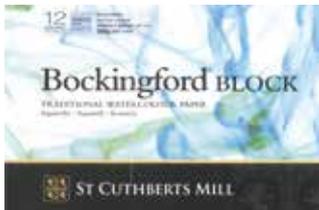

Top quality artists blocks with the popular 100% rag Arches watercolour paper. Available in 140lb (300gsm) HP, NOT and Rough. 140lb blocks have 20 sheets. 300lb blocks have 10 sheets.

**What is Cartridge Paper?** The most popular surface for drawing and sketching is cartridge paper. There are many types of cartridge paper available. The most popular papers are often white with a slightly toothed surface and are of a light to medium weight. Internally sized papers can be used quite well for drawing and sketching but a harder, surface sized paper is necessary if a lot of rubbing out and reworking is required.

The degree of coarseness or tooth of cartridge paper also has a direct impact on the character of your work and how the final image will appear.

## INVISI LIGHTWEIGHT PICTURE DISPLAY EASEL

INVISI is a revolutionary lightweight picture display easel, enabling effective table displays without the fear of toppling. INVISI packs flat for easy storage and transportation. The product was initially designed for Art Clubs but is also ideal for solo artist exhibitions and for use by galleries. The product uses structural plastics and is very strong when erected. If you fold and store your Invisi Easels flat and in a box they will last many years if cared for.

INVISIs are designed to hold pictures with a backing board, but can hold canvas as long as there is something at the back for the supports to lean on. INVISI's will not hold 3D canvas. Max picture height approx 24"

*INVISI's can hold lighter pictures (eg. Unframed canvas board) up to about 24" high. If the picture is heavier (eg. Framed with glass) the maximum height will be less, depending on the weight of the picture. For very wide pictures it may be advisable to use an INVISI on each end of the picture. The INVISI can hold pictures/canvas up to a maximum of 1.5" deep, although we do not recommend it to hold chunky canvas as it may be a bit tight.*

*Perfect for exhibitions*

The original paper stretcher

# PERFECT PAPER STRETCHER

## THE EASY WAY TO STRETCH PAPER

The paper stretcher was invented in 1943 by Ken while he was stationed near Bletchley during the second world war, and is now used by artists all over the world.

Listen to what some say...

- "Brilliant! Why didn't anyone think of this before?"

- "Every watercolourist needs one."

- "Its ended my paper stretching nightmare!"

- "Watercolour boards and 300lb paper are a thing of the past."

Visit our website to see a video demonstration:

[ARTSUPPLIES.CO.UK/PPS](http://ARTSUPPLIES.CO.UK/PPS)

Stretch your watercolour paper (up to 140lb) and dry it 'tight-as-a-drum' in minutes and it will not cockle or pull away no matter how wet the wash.

The board is made from top quality wood and comes with 4 plastic gripper rods and full instructions.

This is a simple and certain way to use lightweight paper and save time and money with no fuss. The boards are available in full imperial (20" x 28"), 1/2 imperial (13.5" x 20.5") and 1/4 imperial (9.5" x 13.5") sizes. They are ideal for use with the 1/4, 1/2 and Full imperial watercolour paper.

### STEP 1

After soaking paper, position the board over the paper.

### STEP 2

Remove excess moisture (with a cloth or towel) and pinch the corners of the paper to follow the edges of the board.

### STEP 3

Secure paper by tapping the four rods into the grooves around the board.

### STEP 4

The paper can be dried immediately using a hair dryer or heater. Alternatively, can be left to dry naturally.

A screw-on bracket is available to convert a camera tripod into an easel. Size 2.5" x 2.5".
